

v4--v7 paired depth/work ratios

Depth > 1 favors NOG; work near 1 indicates similar training-oracle work

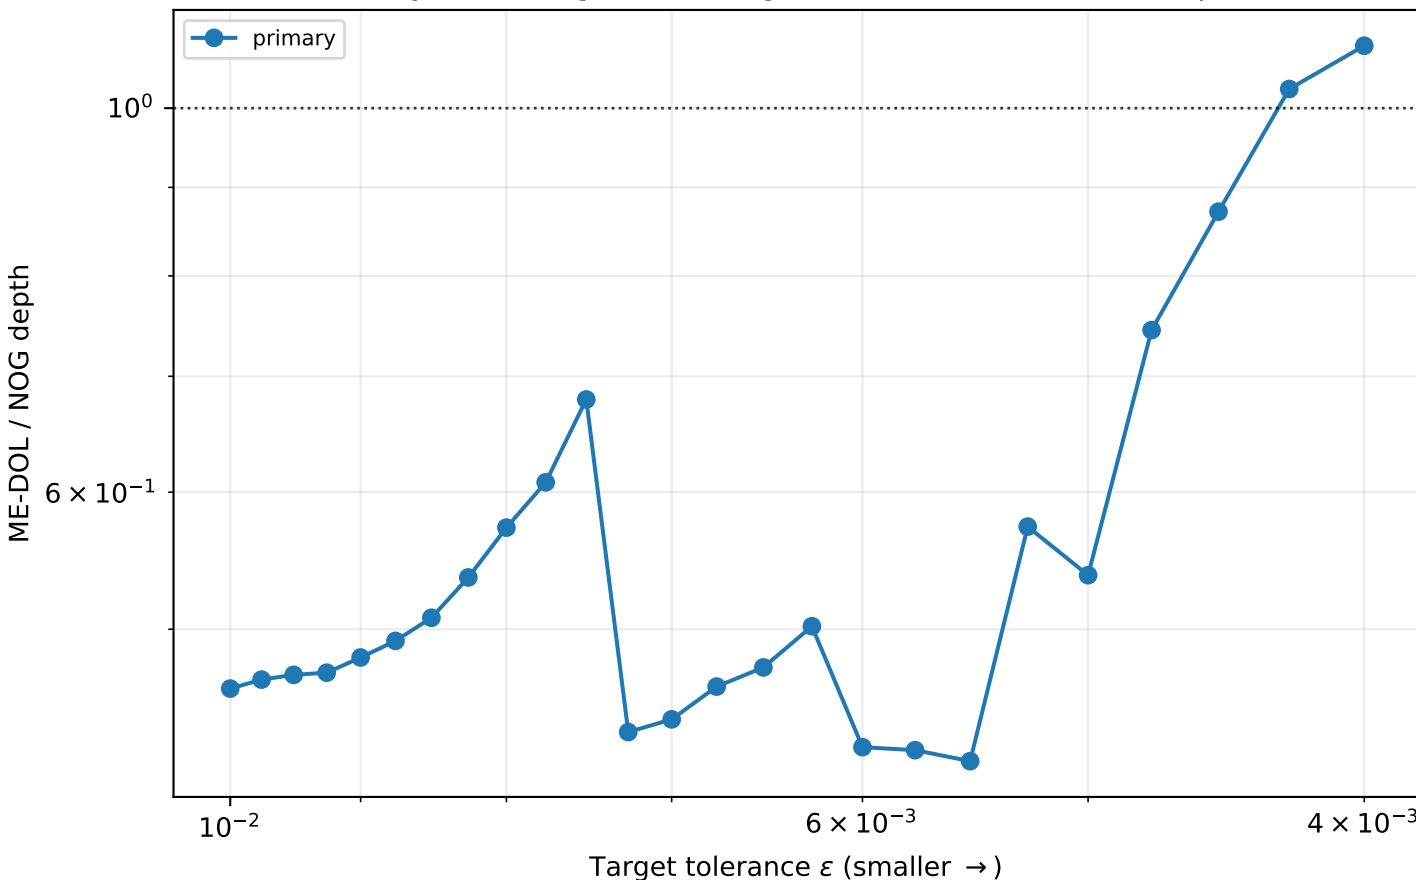

v4 fixed algorithms + matched-work batch: ME-DOL / NOG depth

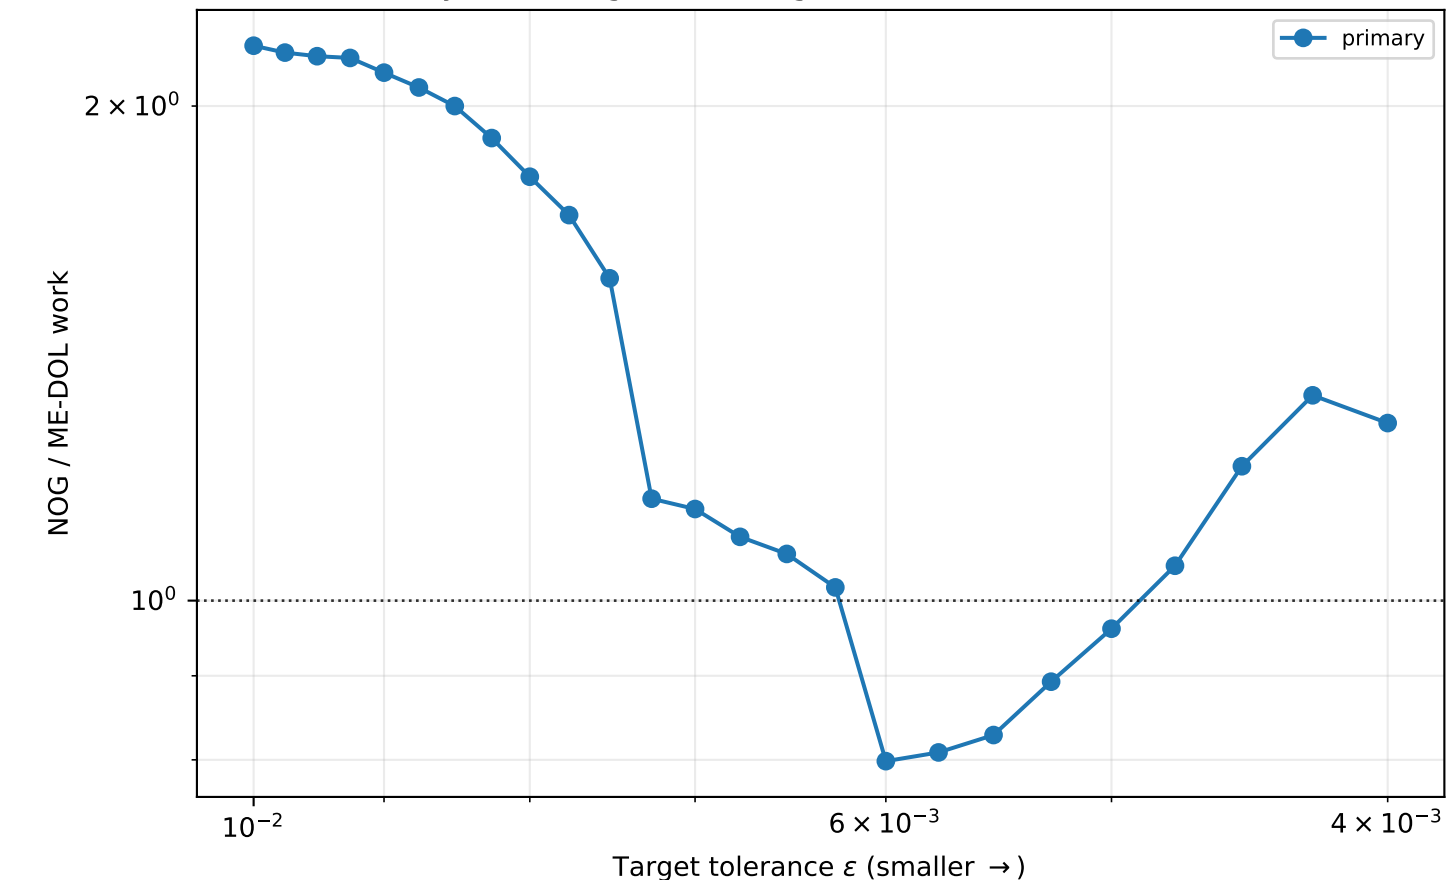

v4 fixed algorithms + matched-work batch: NOG / ME-DOL work

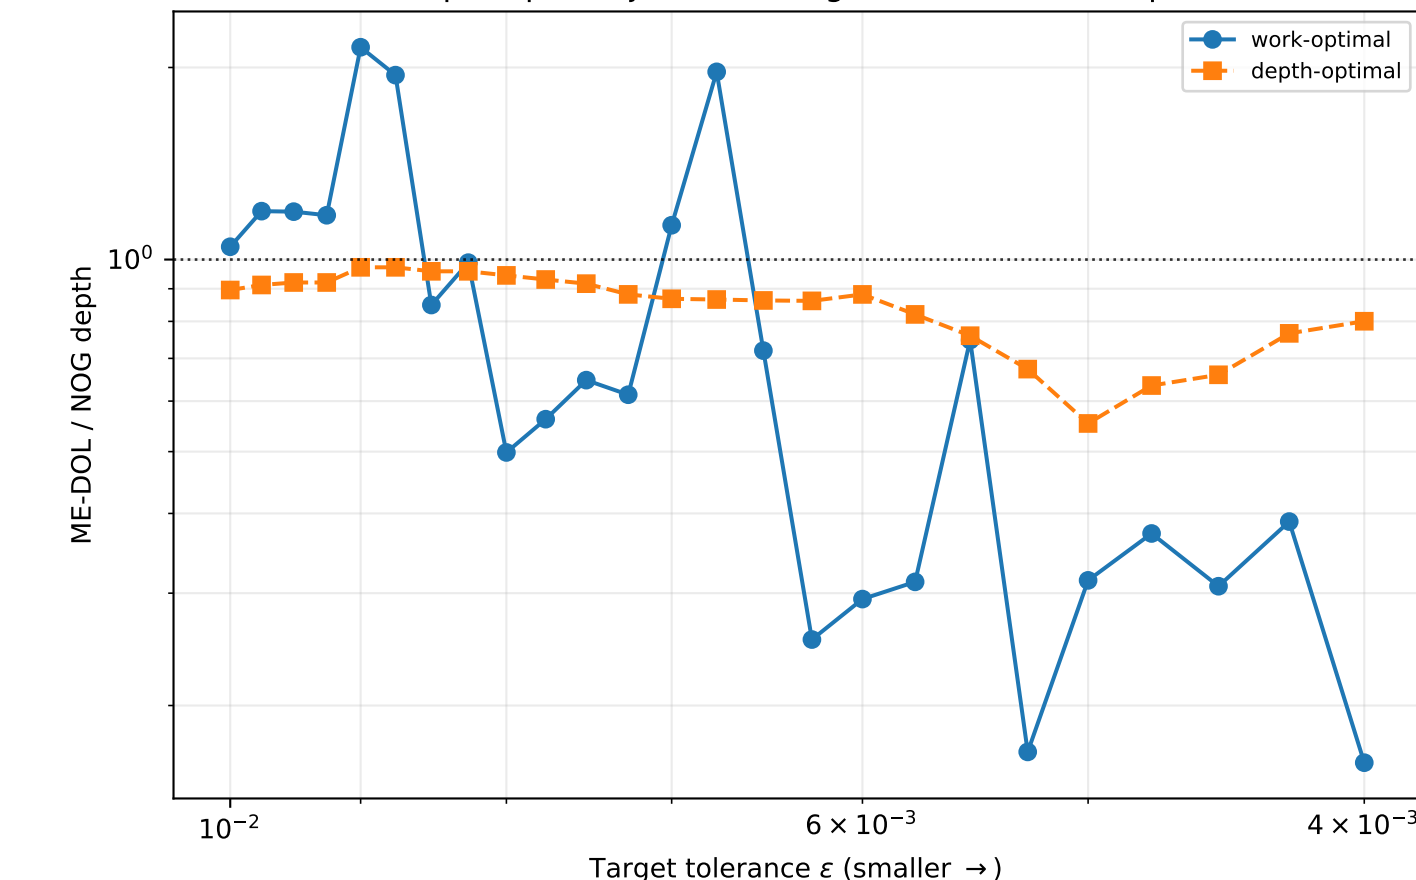

v5 symmetric global configuration: ME-DOL / NOG depth

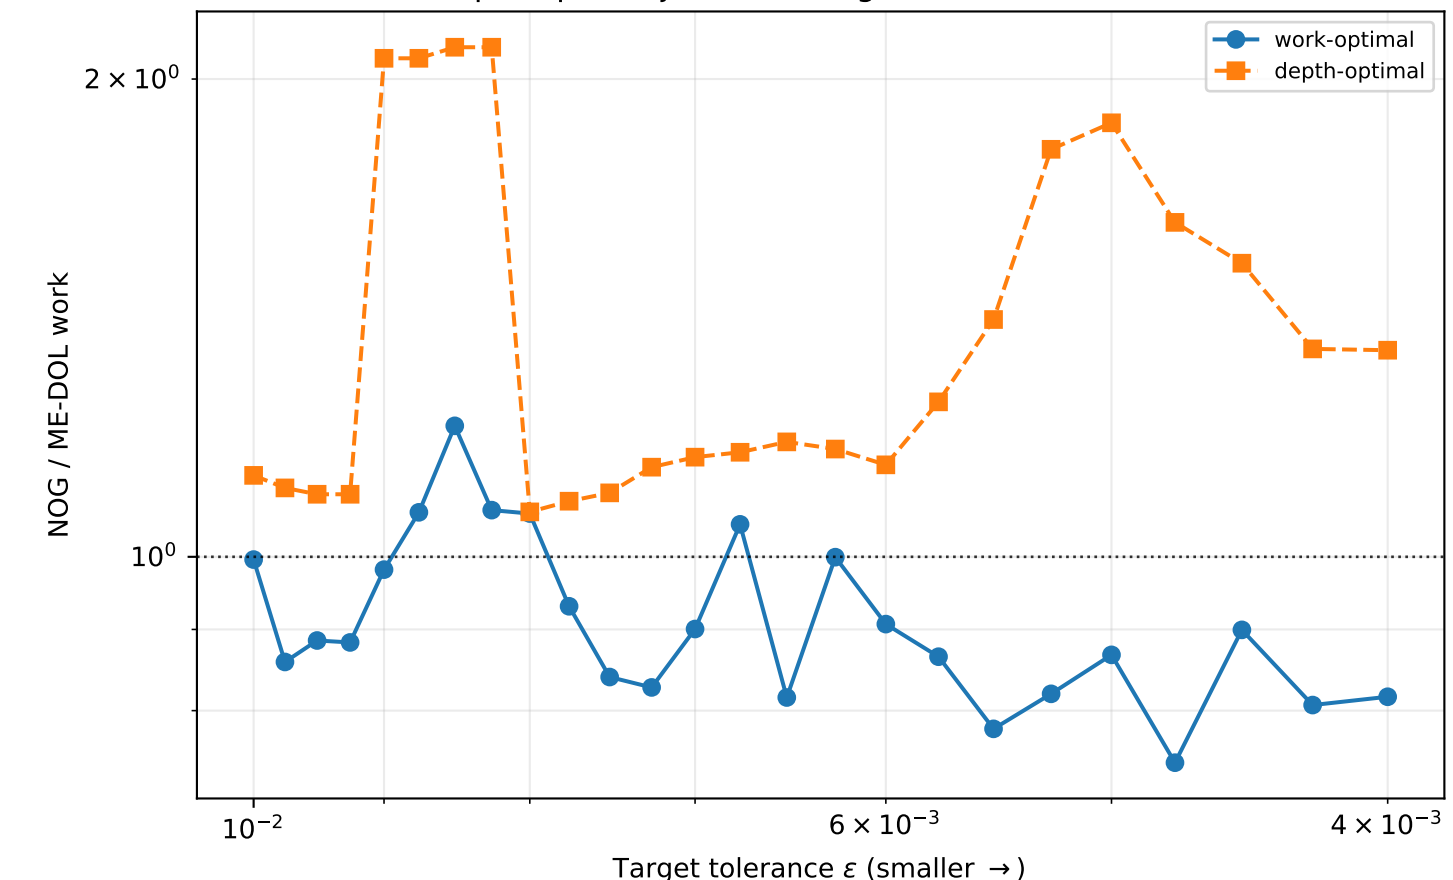

v5 symmetric global configuration: NOG / ME-DOL work

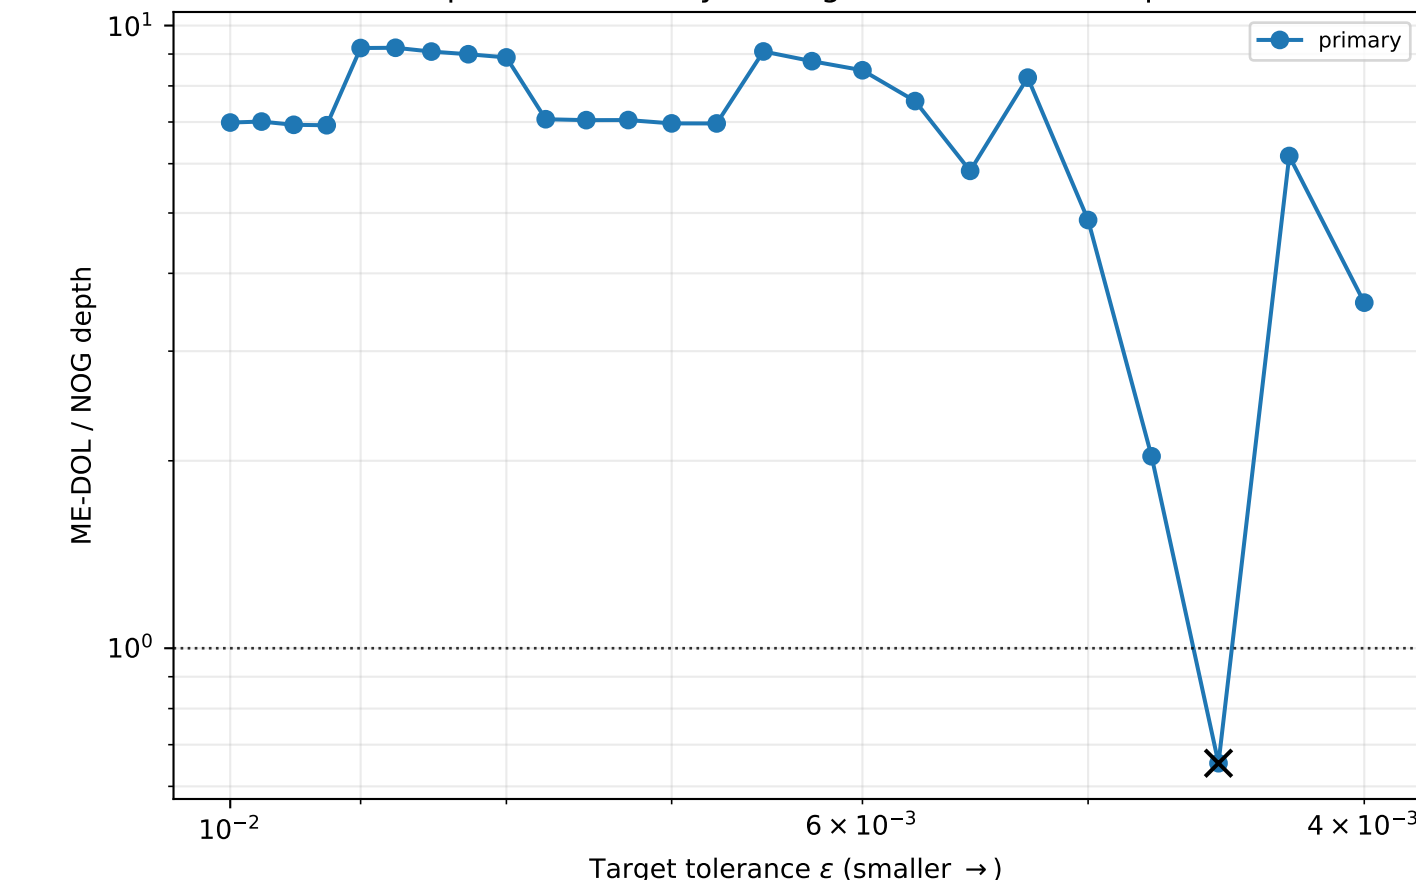

v6 per-epsilon joint retuning: ME-DOL / NOG depth

v6 per-epsilon joint retuning: NOG / ME-DOL work

v7 piecewise theory scaling: ME-DOL / NOG depth

v7 piecewise theory scaling: NOG / ME-DOL work
